Dr. Amnon Naamad

- ✓ The Hi-Tech industry in general is going through a period of faster and bigger changes, and this creates opportunities for smart engineers and entrepreneurs
- ✓ The IT industry is a good example. It is at an inflection point because of major developments in technology and changes in the use paradigms of IT resources
- ✓ The presentation will focus on the technical challenges facing the IT industry and the Storage industry in particular and the opportunities that these challenges create for you
