

CONTENTS

Dedicated 70-years of birthday V. G. Maz'ya

Vladimir Gilelevich Maz'ya (dedicated to his 70th birthday).....	3
<i>Dem'yanovich Yu. K.</i> Wavelet decompositions for functions on a differentiable manifold.....	7
<i>Nazarov A. I., Petrova A. N.</i> On the sharp constants in some high-order embedding theorems.....	16
<i>Nazarov S. A.</i> Bases of singular solutions in problems of the crack mechanics.....	21
<i>Nikotin V. M.</i> Extreme values of characteristic functions for the Sturm—Liouville operator.....	35
<i>Sil'vanovich O. V., Shirokov N. A.</i> Smoothness of a function and the rate of approximation.....	39
<i>Soloviev A. A.</i> L_p -boundedness of boundary integral operator on contour with peak.....	46

Mathematics

<i>Borzykh A. N.</i> About an optimization algorithm calculating the largest singular value of a real matrix.....	59
<i>Vavilov N. A., Kazakevich V. G.</i> One more variation on the theme of decomposition of transvections.....	71
<i>Ermakov S. M., Rukavishnikova A. I., Timofeev K. A.</i> On some quasi-stochastic methods of equations solving.....	75
<i>Kabardov M. M.</i> On the Euler—Knopp summation of the Laguerre series in the Laplace transform inversion problem.....	84
<i>Tikhomirov S. B.</i> Interiors of sets of vector fields with shadowing properties corresponding to some classes of reparametrizations.....	90

Mechanics

<i>Bauer S. M., Tipyasev A. S.</i> On the Mathematical Model of the Measuring of the Intraocular Pressure by Maklakov Method.....	98
<i>Bestuzheva A. N.</i> Problem of diffraction of waves on a cone.....	102
<i>Vovnenko N. B., Zimin B. A., Sudenkov U. B.</i> Specialty of generation of dynamical stresses in heat-conducting and low heat-conducting media under sub-microsecond heating rate.....	110
<i>Dahl Yu. M., Morshchinina D. A.</i> On the stress-strain state of an intraocular lens (IOL).....	118
<i>Lashkov V. A.</i> Interaction of solid particles of two-phase flow with a surface of complicated profile.....	125

Astronomy

<i>Bashakov A. A.</i> The testing of phase models of stellar systems constructed by Schwarzschild's method.....	131
