

CONTENTS

Mathematics

<i>Zuber I. E., Gelig A. Kh.</i> Stability of uncertain discrete-time systems	3
<i>Krym V. R., Petrov N. N.</i> The principal bundles and the problem of topological quantization of charges	10
<i>Lebedinskaya N. A., Lebedinski D. M.</i> Multiresolution analysis for Zlamal approximation	18
<i>Memnonov V. P.</i> Testing of random number generators via simulation of a problem with exact solution	23
<i>Smirnova V. B., Utina N. V., Shepelyavyi A. I., Perkin A. A.</i> Frequency—domain estimates for the number of slipped cycles in a phase system with vector nonlinearity	33
<i>Tovstik T. M.</i> On the criteria when estimating the cubature formulas residue	44

Mechanics

<i>Arutyunyan R. A.</i> The embrittlement problem in material science	54
<i>Babarykin K. V., Kouzmina V. E., Matveev S. K., Petrova V. N.</i> Research of self-oscillations in the impacting jets	59
<i>Bogatko V. I., Kolton G. A., Potekhina E. A.</i> About the peculiarity of Lagrange variables application in the problem of the hypersonic flow past the body	68
<i>Lashkov V. A., Matveev S. K.</i> Changing of roughness of a surface under impingement of solid particles	76
<i>Lestev M. A., Tikhonov A. A.</i> Nonlinear effects in dynamics of micromechanical gyros	83
<i>Malysheva O. M., Filippov S. B.</i> Influence of eccentricity on buckling of thin ring-stiffened cylindrical shells under action of external pressure	89
<i>Novoselov V. S.</i> Optimal trajectories of the tangential contact	99
<i>Pavlovsky V. A., Nikushchenko D. V.</i> The rheological model for computation of flows in a wide range Reynolds numbers	104
<i>Pronina Yu. G.</i> Equal mechanochemical corrosion of an ideal elasto-plastic hollow sphere under constant pressure	113
<i>Ryabinin A. N., Irissou E., Legoux J.-G., Moreau C.</i> Heat exchange of a supersonic jet with an obstacle in the cold spray	123
<i>Tsibarov V. A.</i> The stochastic method in the vascular hemodynamics	129

Astronomy

<i>Kuznetsov E. D., Kholshchevnikov K. V.</i> The orbital evolution of the two-planet system the Sun—Jupiter — Saturn	139
